Garrison Dental Solutions’ Reel Matrix

Contemporary Product Solutions presents its review on this matrix system designed for all posterior procedures.

by CONTEMPORARY PRODUCT SOLUTIONS

The CPS Evaluation Team, consisting of dentists, assistants, hygienists, patient coordinators and the dental laboratory, evaluated the Reel Matrix by Garrison Dental Solutions.

CPS produced the following comments and reviews following its evaluation:

Dentist comments

- “Improved the overall contour of large MO or DO restorations and allowed better control of MOD restorations.”
- “The ease of placement.....I had a lot more freedom in moving the matrix around the tooth in case I had a large buccal area that needed to be restored...plus the cinching device was super easy and foolproof.”
- “The cure-through bands didn’t have the strength to go through tight contacts on the unprepped side of the tooth, same with the dead-soft - I kept scrunching them trying to get them to seat.”

Assistant comments

- “Hell it was very easy to handle without any assistance. I liked the easy grip handle and also with a little click it let go and I could continue on with the restoration”
- “Easy placement, variety, loved the different sizes of wedges”
- “Cure-through matrix and the delivery system (handle).”

Instructions

The manufacturers instructions were included in the package along with sample sizes for patients to evaluate.

Packaging

The Reel Matrix comes with 60 matrices (10 each size), 1 Tensioning Instrument and 4 different size wedge wands.

REEL MATRIX

The Reel Matrix is a matrix system with instruments and matrices for every posterior procedure. The Reels pop into the handle and press the Reel into the handle and retract the grippers to lock the Reel in place. The matrices are pre-contoured in the three dimensions and when combined with anatomical wedges and separator rings.

Improved the overall contour of large MO or DO restorations and allowed better control of MOD restorations

Mickey Bernstein and Team
Remarkably efficient design!
The ease of use of the Reel Matrix will speed up your placement of large restorations and core buildups.

Dr. Dory Stutman Mickey Bernstein and Team

Easier to place Wedges than when you have a matrix holder in place.
Dr. Jeff Huisman and Team

Clinical indication
Reel Matrix™ uses a pre-contoured Tofflemire-style matrix band coupled with an applicator handle for direct composite and amalgam placement.

Evaluation Team Feedback
With a review from 25 evaluation team members and used on 218 patients, The Reel Matrix by Garrison Dental Solutions was welcomed with open arms to all the dental assistants who used it.

CPS Team gives Reel matrix by Garrison Dental Solutions a 4 Diamonds rating.
